

# Seeking Research Participants For Study About Pain And Recovery

## About The Study

We are looking for people to complete interviews (online or in-person) to help us better understand how treatment or self-management strategies (e.g., things you do in your everyday life) can positively change your life after it was negatively impacted by pain. We hope this study will inform practices to improve the lives of people living with pain.

## Study Requirements

- 18 years or older
- Living in Denmark
- Experienced daily or near-daily pain for at least 3-months
- Your life, sense of self, or identity has been disrupted by pain
- Experienced successful (positive) changes to your life, sense of self, or identity through clinical treatment or self-management strategies for your pain

## Your Role

- 15-25 minute screening interview (online) in English (or Danish if needed)
- 90-120 minute interview (online or in-person) in English and Danish

## INTERESTED IN PARTICIPATING? QUESTIONS?

The study is a collaboration between University of Southern Denmark and the Specialized Hospital for Polio and Accident Victims. For more information, please email researcher Peter Stilwell at:
